

# What You Can Do Today: April 5th

April 05, 2020

## Resources and LP's response to COVID-19

Even among this disruption, there are a few things you can do today to help prepare you, your family and your business for the uncertain future.

1. **Identify and redress any weak links in your supply chain, before the chain breaks.** Is the success of your business predicated on the ability to source materials from third-parties? You have a few options. Forecast your needs over the near and longer terms, contact your suppliers, and consider if there's a need to seek counsel.
2. **Hospitality industry, find areas where you can reduce costs.** Local restaurants and bars are taking it on the chin right now. Unable to operate per usual could be starving your business of

cash flow while financial obligations stack up. Right now, you can ask some key questions that could help you identify opportunities to immediately relieve financial pressures.

3. **Get out of your house, without leaving your house.** Let NASA bring the universe into your home this weekend with e-books, virtual tours, podcasts and more.
